

Process Engineer Aluminium in Weihai (m/f/d)

Düsseldorf

Shape the future of aluminium processing in a forward-thinking company!

Company

Our client is a global leader in aluminum and textile industries, with over 100,000 employees across domestic and international bases, serving 120+ countries. Their European HQ, established in 2020 in Düsseldorf, drives sustainable innovation.

Their subsidiary in Weihai, China, is a high-tech enterprise specializing in intelligent ma-nufacturing. With an annual capacity exceeding 100,000 tons, it produces cutting-edge hot-rolled blanks, including CTP plate blanks and aluminum foil blanks. Renowned for its innovation and strong capabilities, the company leads the industry.

Stellenbeschreibung

- Developing and optimizing technical procedures, regulations and quality standards of finished products, main raw and auxiliary materials
- Analyzing product quality issues and implementing effective measures during the production process of aluminum
- Negotiating and evaluating the technical requirements of customer orders
- Supervising the advancement of related CTP process technology
- Collaboration with the product and quality departments of the company

Besondere Anforderungen

- University degree or apprenticeship of engineering or related fields of work
- Professional experience in aluminium processing such as cold rolling or casting
- Preferably know-how in the CTP substrate production according to German standards
- Business fluent language skills in English
- Willingness to work in Weihai for half of the year, and remotely for the remaining time.

Benefits

- Permanent position
- Housing allowance or accommodation
- Special cultural experience
- Lead the team to achieve process breakthroughs
- Other required benefits
